

If the blower is used outside and there is a light wind, face the blower so that it blows in the same direction as the wind [pic 10].

Always pour the remaining bubble liquid back into the bottle after use. There is a spout on the bottom edge of the blower opening [pic 11] to help pour cleanly. Always wipe dry before putting away.

[pic 10]

[pic 11]

For best results place blower unit approx 800mm off ground level.

The contents are expressly designed for the purpose described and shown, neither should be placed in or near water, they are electronic and will not withstand repeated mistreatment.

CONTENTS:
2 Bubble Buster Wands
Bubble Blower
Bubble Buster liquid

WARNING: Residue from the blown bubbles can cause the surface below the blower to become slippery.

Battery information

BUBBLE BUSTER INSTRUCTIONS

TO ENJOY BUBBLE BUSTER PLEASE READ THESE IMPORTANT NOTES:

- 1. Not all burst bubbles will make a PING noise. The slower and more deliberate the movement to prod and burst a bubble, the more likely it will PING.**
- 2. The very best way to make a PING is to "catch" the bubble between the antennas, then twitch the wand to burst it.**
- 3. In dry air it may help to rub a little bubble-liquid over the balls at the ends of the wand's antennas so it PINGS more easily.**
- 4. If the wand makes a continuous noise, the head needs to be wiped clean of bubble liquid.**
